

Tutor for the module "Practical Introduction to Programming with Python"

We are looking for a tutor for the Master's module "Practical Introduction to Programming with Python" (1511-501) of the FG for Food Informatics (150L) in the winter semester 2024/25.

Job description

The role involves offering weekly teaching groups in which questions are answered and advice given on the exercise sheets. The employment will be from Sept 16, 2024, to Feb, 28, 2025, (period can be adjusted after consultation) for up to 40 hours/month. The module will be held in English. An extended scope in combination with activities to support our research is possible.

Topics of the event are:

- Programming with Python
- AI coding tools (e.g. ChatGPT, Github Copilot, ...)
- Computer networks / API programming
- Data analysis (with pandas, seaborn, matplotlib)

Requirement profile

Basic knowledge of programming with Python is expected, e.g. by taking a module in our department (1511-201 "Grundlagen der Informatik", 1511-400 "Computational Thinking", 4407-481 "Introduction to Machine Learning in Python" or "Practical Introduction to Programming with Python", 1511-501).
